

Integrated Care – December Update

Welcome to the sixth edition of our update on activities and decisions around the Integration of Home, Community, Primary and Specialist Services for the Capital & Coast DHB district.

Care Coordination Centre (CCC)

Just a reminder that the CCC is now up and running, the CCC is the entry point for the majority of home and community services. The contact details for the CCC are:

Telephone

(Including after hours): 0800 282 200 or (04) 238 2020

Fax: 0800 282 202 or (04) 238 2022

Email: wellington@coordination.org.nz

Address:

10 Wineera Drive

Porirua

The following community services are exceptions to this:

- People who have a life long disability and require long term disability support should still be referred to Capital Support
- People who require rehabilitation services as a result of long term impairment, and who are 16 to 55 years, should still be referred to Capital Coast Rehab (Assessment Treatment & Rehab – AT&R).

If you are unsure where to refer someone, just call the CCC and they will help you.

So, until our next newsletter in 2006, when we will have more information about the package of care approach to home & community services that we are developing please accept our seasonal greetings and best wishes for the new year.

Merry Christmas and
Happy Holidays
