

To Practices

We are very pleased to be again offering the International Nurses Day awards for registered nurses working in primary health care and aged and residential care.

These awards are provided by Capital and Coast DHB to support nurses in their professional development. The 10 awards are valued at \$1000 each and have been used successfully in a variety of ways: attendance at conference or education programmes; study tours with a specific purpose and coaching / supervision.

This year the International Council of Nurses theme is **Closing the Gap: Increasing Access and Equity**. We will be using the awards to support nurses who able to show how their nursing interventions increase access and equity for health consumers.

To apply for an award, please see the accompanying Application Form.
