Learner information and a step-by-step guide to accessing the module

#### **Who is this module for?**

This module is designed to support all health professionals to have an understanding of the End of Life Choice Act 2019 and assisted dying services.

Health practitioners, including medical practitioners, nurse practitioners and nurses, who work in end-of-life care settings are strongly encouraged to complete the module as it may help if you are asked about assisted dying.

#### **Is this module a credential?**

This module is not credentialed. You will be able to download a certificate as evidence of completion.

#### **I don't want to be involved in providing assisted dying services, should I still complete the module?**

All health professionals are encouraged to complete the module, even if they are not likely to be involved in providing assisted dying services, including for reasons of conscientious objection.

The module includes information about conscientious objection and a health practitioner's rights and responsibilities under the Act.

## Can I revisit the module later on?

Yes, you can revisit the module at any time to refresh your learning. It is recommended you complete the module before 7 November 2021, which is when assisted dying will become legal.

## Does my employer get access to the module?
